

**Renovate Right and Protect Your Family from Lead In Your Home**  
(Important Lead Hazard information for Families, Child Care Providers and Schools)  
**Booklets Acknowledgment form**

I \_\_\_\_\_, have read the booklets and understand that if the home was built before 1978, and if it has paint in poor condition and if the paint will be disturbed as a result of repairs, a Visual Inspection must be performed and a Lead-Based Paint Clearance test must be performed. The visual inspection will be performed by the Housing Authority and provided to the owner. I agree to use lead safe work practices for all repairs involving the disturbance of lead paint. It will be my responsibility as the owner to obtain a clearance test which is to be performed by an independent Certified Lead Inspector and to provide a copy to the Housing Authority. This must be done prior to occupancy of the property if it was vacant during the rehabilitation. Should the property be occupied by a third-party, such as a tenant or successor owner, I agree to provide such party copies of "Renovate Right" and "Protect Your Family from Lead In Your Home" booklets. This is a Federal Law requirement.
